DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-20, 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takeuchi (2002/0025484). Takeuchi teaches an electrophotographic photoreceptor having the same structure as the instant invention (paragraph 56) where a charge transport material (page 36) and a binder resin (paragraph 54) is applied to a support through the use of a solvent (paragraph 74). It would have been obvious to one of ordinary skill in the art to use any art recognized equivalents of the components of the photoreceptor and apparatus taught by Takeuchi because of the well known use of such and the expectation of similar performance in art recognized configurations including well known drums and cartridges.

Response to Arguments

3. Although the amendments have overcome the rejections in respect to claim 19, Applicant's arguments filed 4-8-05 directed to the above repeated rejection have been fully considered but they are not persuasive. Applicant argues that Takeuchi does not teach an undercoat layer containing a charge transport material. This is clearly suggested in paragraph 56. Applicant also argues that Takeuchi does not teach the specified charge transport material. This is clearly suggested starting on page 36.

4. Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action with respect to Claim 19. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
